## **COMMITMENT TO CUSTOMIZED, INTEGRATED, QUALITY CARE**

The mission of Quality Behavioral Health is to provide you and your family with assistance and guidance during periods of transition and distress.

At Quality Behavioral Health our evidence-based treatment model emphasizes the importance of understanding human health and the basis for human behavior and mental illness. This approach includes the integration of biological, psychological, and social factors that are influential in the assessment, diagnosis, and treatment of behavioral disorders. Both pharmacological and psychotherapeutic methods are employed.

### **Practice Guideline**

Your first visit at Quality Behavioral Health will be an assessment conducted by a licensed psychotherapist. The assessment will gather information for the therapist and psychiatrist to make an accurate diagnosis.

Treatment may or may not include medication. However, if medication management is indicated by a staff psychiatrist **it will also be required** that you receive counseling during the period of treatment. Frequency of appointments will be determined by the patient and therapist.
